Profile Summary

Senior Software Engineer with 10+ years of experience in PHP (Laravel, CodeIgniter), MySQL, Node.js, and React.js development. Skilled in building scalable web applications, REST APIs, and third-party integrations. Experienced in implementing AI-powered solutions using OpenAI and Google Gemini APIs for automation and intelligent features. Strong expertise in full SDLC, Agile development, and performance-focused backend architecture.

Professional Skills

- Expert PHP Development
- YII Framework

AI / GenAI Skills
- OpenAI API Integration, Gemini API Integration, Prompt Engineering
- AI-powered Automation
- REST API Integration, NLP Basics, AI Response Processing, Generative AI Applications

- JavaScript & jQuery
- Shopify Store Development & Integration
- WordPress Development
- Scrum, Jira, GitHub, SourceTree, SonarQube & Docker
- Expertise in CodeIgniter
- Python (Core Python)
- AWS (EC2,SQS,CDN,ELB)
- Application Performance Monitoring (APM) – New Relic & Datadog
- Ajax & API Integration
- Problem Solving & Troubleshooting
- Team Collaboration & Agile Development
- Integrated third-party payment gateways (e.g., Razorpay/Stripe/PayPal) into web applications
- Database Optimization (MySQL)
- Laravel Framework

AI Tools
- Github Copilot
- Cursor
- ChatGPT
- Codex
- Claude

- Node.js & React.js
- HTML5, CSS3 & Bootstrap 5.3
- Production Support (Ticket Handling, Debugging, RCA, Live Fixes)
- MySQL & MongoDB
- Implemented security best practices in web applications (input validation, authentication, authorization, session management)

Professional Experience

05/2015 – 06/2026
Ahmedabad, India

SStech System Solution Pvt Ltd
Senior PHP Developer
- Integrated AI services including address validation (Python) and support ticket prioritization (PHP) to improve automation and efficiency.
- Designed and developed scalable logistics-domain products with maintainable architecture.
- Improved application performance and scalability through technical optimizations.
- Wrote clean, reusable, and efficient code following best practices.
- Managed MySQL database integration for reliable data storage and retrieval.
- Developed and deployed new features to support business workflows.
- Handled debugging, testing, and production issue resolution.

Projects

- AI-Based Support Ticket Prioritization System
- OmniReturns – Return Management Platform
- OmniWMS – Warehouse Management System
- HRMS – Human Resource Management System
- Shopify Shipping Automation App
- Share Stock Management System – Real-Time Stock Price Integration Platform
- Jet07 – WordPress Business Website & Service Platform
- Help & Care – WordPress Pet Care Services & E-Commerce Platform
- Event Management System – Node.js & React.js Based Event Booking and Management Platform
- Lead Management System – Laravel CRM & Sales Lead Tracking Platform
- AI-Powered Address Validation System
- OmniRPS – Returns Processing System
- OmniCardPay – Payment Processing Platform
- Pets and Trends Shopify Store
- Driver007 – Courier Pickup & Delivery Management System & WordPress Website
- SStech System – WordPress Corporate Website
- InnerWear – WordPress E-Commerce Innerwear Store
- Redsfans – Social Media Content Management Platform with Facebook Auto-Posting Integration
- DRC – WordPress Business Website

Education

05/2010 – 05/2013
Wadhwan, India

Master's in Computer Applications
C. U. Shah College of Engineering & Technology (Under GTU)
Designed and implemented a web-based stock management project to streamline inventory tracking and updates.

04/2007 – 04/2010
Ahmedabad, India

Bachelor's in Computer Applications
JG College of Computer Application (Gujarat University)
Designed and implemented a web-based medical store management project for online purchase and inventory control.

Interests

- Artificial Intelligence (AI) and Generative AI applications in web development
- Scalable backend architecture, APIs, and system design
- Cloud platforms and deployment practices (AWS, DigitalOcean)
- AI integration in backend systems using APIs (OpenAI, Gemini)
- Performance optimization and database efficiency (MySQL)
- Backend architecture, APIs, and scalable system design
- Prompt engineering and AI-driven automation workflows
- Full stack web development with modern frameworks

Languages

- English
- Gujarati
- Hindi
